Health and safety manager  
Project planner  
Naval architect  
Designer  
Construction manager  
Service technician  
Offshore logistics coordinator  
Crane driver  
Cable layer  
Catering  
Accommodation  
Divers

**Careers and jobs in the Wind Farm Industry**

## **Research one area of work that might interest you and find out:**

What job you could do?

What would that involve doing?

What qualifications might you need, could you do it straight from school or would you need to go to University and if so what would you study?

What sort of salary might you start with?

What skills do you think you would need?

Compare your answers with the person next to you.

Does the large variety of jobs surprise you?

## Evaluation of your product and your understanding about wind power.

On your sheet answer the questions in each box, try to be as detailed as possible.

What I have learnt? What do I now know?	
What did I do well? Did the final product fulfil the design brief?	
What would you do differently next time?	

Produce you own **WORDLE** using words from your evaluation.  
What are your key words?
