

Champions for Wind

For Future, For Wind – Project Synopsis

Developed by: Kelvin Hall High School

Resource audience

Age group: Year 9

General ability developed for: KS3 Level 4-XP

Number of Learning hours: (6-7 hours per project)

Subject area:

Humanities (Geography and Philosophy)

Project title: For Future, For Wind.

Project synopsis:

Geography – sustainable energy and The Energy White Paper, impact on the local community/ environment, future careers in Energy.

Philosophy and ethics – The Philosophy of Christian, Buddhist and Hindu stewardship, opinions on stewardship, debate of “Is environmentalism the new religion?”

The project includes written pieces of individual work, collaborative work measured by success criteria and optional work using available digital media. All the lessons are levelled and progress can be easily measured. The project also comes fully resourced with colourful student-friendly PowerPoints on both subjects – plus an interactive careers resource, worksheets, exemplars, film clips, scheme of work – including lesson plans, levels of assessment, links to PLTs and links to National Curriculum.

The project also comes fully resourced with plastecine (should any of your students wish to complete their project work using simple animation) for the first two schools who opt for either package.
